and 'L' Dimension are the same as for BarGrip XL above.

equals the coupler length.

* Minimum Rebar Insertion equals the swage length. Maximum Rebar Insertion

BPI® EQUIPMENT

BG750M MIDSIZE FIELD PRESS 40 kg

mostly used on 25, 29, 32, 36 mm bar

BPI® COUPLER SIZES Ø16 - Ø36mm

25 kg mostly used on 20, 22, 25 mm bar

BPI® COUPLER SIZES Ø10 - Ø25mm

BG1140M HEAVY-DUTY FIELD PRESS 95 kg mostly used on 32, 36, 43, 57 mm bar

BPI® COUPLER SIZES Ø22 - Ø57mm

BP2600Bench press for 1/2-swaging all bar sizes up to 57mm. Double acting cylinder connected to 10 or 15 hp pump for high fabrication shop productivity - includes foot control, lifting eyes and leveling feet - weighs 725 kg.

JL JL.

BPI® COUPLER SIZES Ø10 - Ø57mm

BPI® **swaging equipment** for the installation of coupling sleeves and connectors consists of a hydraulic *PRESS*, *PUMP* and *HOSE* with suitable swaging *DIES*.

Press models for field swaging range in size from the BG 250 for splicing #3-5 rebars (\emptyset 10 – 16 mm), to the BG 1140M for splicing bars up to #18 (\emptyset 57 mm). Each press is provided with a lifting handle and/or lifting eye for support. By a simple change of die set, each press is capable of swaging multiple sizes of coupling sleeve inclusive of BarGrip XL, Transitions and Structural Connectors. For ease of use, dies and coupling sleeves are stamped and color-coded to match.

A hydraulic pump, electrically-driven or gasoline-driven, connects to the press by means of a hose with quick-disconnect ends. The equipment operator depresses a foot control to actuate the system. As the ram of the press extends and pushes the dies towards each other, a portion of the coupling sleeve is forced to deform around the rebar and interlock with the bar profile. When each swaging bite has been completed, a pressure switch, built into the pump, automatically stops the process to allow the ram of the press to retract for the next bite. After a coupling sleeve has been fully swaged, the operator simply removes the outer die pin and slides the outer die out of the press for convenient removal of the press from around the spliced rebar.

Pump Model	PE 55	PE 400	PG 400			
Driver	1 % HP Electric Motor	10 HP Electric Motor	18 HP Gasoline Engine			
Power Supply	115V 1-phase	230V or 460V 3-phase	Battery Start			
Weight with fluid	66 kg	274 kg	247 kg			
Most common use	Rebar Ø10-36mm	Rebar Ø28-57mm	Rebar Ø28-57mm			
Attributes	Compact / Maneuverable	Fast / High volume jobs	No power supply required			

A Bench Press can be utilized by the rebar fabricator to efficiently ½-swage coupling sleeves to rebars ahead of shipping, thereby saving time on the jobsite.

NOTE: In lieu of shop $\frac{1}{2}$ -swaging with a Bench Press, it may sometimes be appropriate to use a field press such as a BG1140M or BG750M - contact BPI for assistance with your application.

BPI® Equipment is available for lease or purchase. Equipment must be used in accordance with manuals, lease agreements, manufacturers' directions and all safety instructions.
